This programme is designed to provide students with a strong foundation in accounting principles, financial management, and business practices. It equips graduates with the technical knowledge, analytical skills, and ethical understanding required to excel in the accounting profession and make informed business decisions. Throughout the programme, students will study key areas such as financial accounting, management accounting, auditing, taxation, corporate finance, and business law. Emphasis is placed on developing practical skills in accounting software, data analysis, and financial reporting, preparing students for real-world business challenges.

The programme also integrates professional ethics, corporate governance, and regulatory compliance, ensuring graduates understand the importance of integrity and accountability in the accounting field. Students are encouraged to develop critical thinking, problem-solving, and communication skills, which are essential for success in professional accounting roles. Graduates of the Bachelor of Accounting programme are well-prepared to pursue careers in public accounting, corporate finance, auditing, taxation, management accounting, and government financial management, or continue their studies in professional certifications such as ACCA, CPA, or CMA.

Key Learning Areas Include
- Prepare and analyse financial statements
- Apply management accounting and auditing principles
- Understand taxation, corporate finance, and business law
- Use accounting software and financial tools for real-world applications
- Develop critical thinking, communication, and ethical decision-making skills

Entry Requirements
